Hopkins Residence
Bath, Ohio

HABS No. O-262

It is owned and occupied by Mrs. Bair. It was erected about 1830.

The Exterior is in good condition and is of the same design as when built. The interior has been entirely altered, so that no idea of the original arrangement of rooms is possible.

An addition built in recent years is used as living quarters for the present owner. The original building is now used as a tea room and restaurant.

It is of wood construction with stone foundation and is two-stories high. It is located on a main highway in the heart of a small town.

The main entrance is flanked by two fluted pilasters with Ionic ~~base~~ and Capital supporting an entablature of good proportions and fine mouldings.
